

Cake Servings & Price Guide

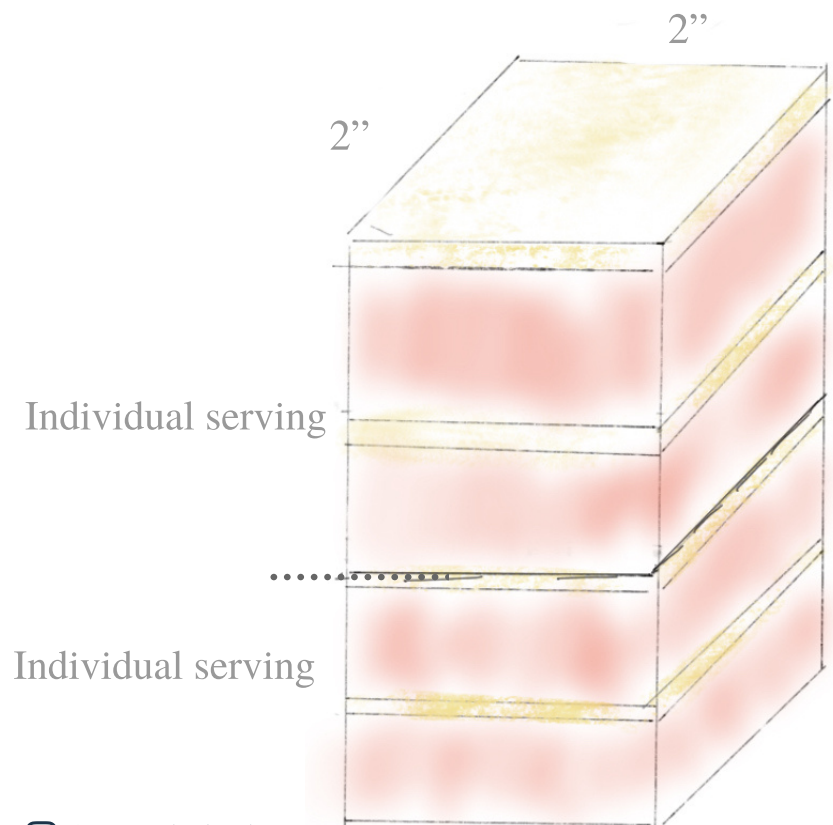

How many people can this cake feed?

Of course, this does depend on the decadence of the cake, how much of a sweet tooth you're feeding, how big of a slice you cut and a variety of other factors.

But here's a suggestion on how you could cut your cake:

We suggest our cakes to be cut to 2"x2" and then divided by two layers. So each person gets two layers of cake, and two layers of buttercream!

Servings Guide

Here's an approximate number of people the cake could feed:

- **5'' cake: 10- 15 people**
- **6'' cake: 15- 20 people**
- **8'' cake: 20- 25 people**

Price Guide

If you're looking to order a custom cake, and you're wondering how much that would cost you, here's a rough idea:

- **5'' cake: starts at \$100**
- **6'' cake: starts at \$120**
- **8'' cake: starts at \$160**

The Price of Custom Cakes

Of course we understand that custom cakes are expensive! But there's much more than just ingredients that go into custom cakes.

To start with, we use the freshest and the best quality ingredients. This also means that we do not buy in bulk so we do not get wholesale prices like other big bakeries. We make every cake fresh to order with fresh ingredients.

Besides the ingredients, you're also paying for the skills and time it took to make this cake. The hours that are spent mixing batters, baking, decorating and cleaning up. Just one cake can take 5 or more hours! And just like you, we need to pay utility bills!

After spending hours on creating a beautiful cake for you, it's only fair for us to earn a small percentage of profit. We too need to make ends meet.

We understand that there are definitely cheaper options available on the market and this by no means suggests that they are inferior in any way. This is merely an explanation as to what is factored into the pricing of a custom cake.

Our cakes are home-made with love and passion exclusively for you!

xx,
Pretti Baked
